STATEMENT OF PURPOSE

Business analytics student with a computer science background seeking to leverage both disciplines to optimize data acquisition, analysis, and decision-making.

SKILLS AND TECHNOLOGIES

- Power BI
- SQL
- ETL
- Python
- Microsoft SQL Server
- Microsoft Excel

CERTIFICATIONS

AWS Certified Developer – Associate

Amazon Web Services Training and Certification
May 2025

Microsoft Power BI Data Analyst

Microsoft
August 2025

EDUCATION

Florida Atlantic University

M.S. Business Analytics

2025 - 2026

University of Florida

B.S. Computer Science

2020 - 2024

EXPERIENCE

Skyline Analytics

Boca Raton, FL

Junior ETL Software Engineer

2024 - 2025

- Designed and deployed Microsoft Azure Function Apps to automate daily data retrieval from multiple third-party APIs
- Cleaned and prepared the retrieved data into internal databases, streamlining access for reporting and analysis
- Built SQL database views and optimized existing ones to aggregate and structure client data for financial analysis in Power BI
- Scripted automated tests for a new internal email tool to ensure client emails were reliably sent and properly formatted
- Reduced storage costs and improved scalability by migrating databases and data from Microsoft SQL Server to PostgreSQL on AWS

Agency Pipe

Delray Beach, FL

Software Engineering Intern

2023 - 2024

- Implemented backend processes for account management and automated data uploads to support client onboarding and integration
- Developed a REST API to support communication between backend services and React-based frontend interfaces, improving maintainability and scalability
- Built a batch processing system to integrate user-submitted data with existing internal systems, enabling seamless large-scale data ingestion
- Improved data accessibility and system integration by writing a C++ script to retrieve public records and upload geospatial data to internal databases

Family Business Funding

Boca Raton, FL

IT Intern

2023

- Directed the transition to OrgMeter, an external CRM software, to streamline business operations and ensure data organization
- Facilitated communication between nontechnical employees and CRM software development teams, ensuring the software met both employee and client needs
- Led the migration of data for over 1,000 clients into customer relationship management (CRM) software
